Instantly web enable IBM i green screens and further extend their functionality with Presto

Improve Appearance, add new Functionality

Change the perception that your IBM i 5250 apps are outdated by using Presto to give them a modern Web GUI. Presto gives you the flexibility to add new UI elements and significantly extend functionality. Instantly transform all your 5250 screens, system screens and third party apps into modern web pages without ever needing to touch source code or recompile.

See how much you can save with Presto

- ▶ Save time and improve processes by deploying browser based applications
- ▶ Eliminate Client Access licenses
- ▶ Reduce costs and risk by not having to rewrite 5250 applications
- ▶ Reduce user training costs
- ▶ Save with the unlimited user option
